

The ITALIAN INSTITUTE OF WARTEGG
in collaboration with
TERAPIATALO SOINTU
presents:

CRISI WARTEGG SYSTEM (CWS) TRAINING Helsinki, Finland, 2018 – 2019

The WDCT is a projective drawing technique that can be completed in 5-10 minutes and is appropriate for children, adolescents, and adults. It is easy to administer and not overwhelming for clients to complete. A recent meta-analysis (Gronnerod & Gronnerod, 2012) attests to its validity in assessing personality and psychopathology. It was also recently recognized as a valid performance-based personality test that can be used for certification in Therapeutic Assessment. Created in 1926 by the German psychologist Ehrig Wartegg (1897-1983), the WDCT consists of eight boxes, each containing an ambiguous mark. The client completes each panel by making a meaningful drawing that incorporates the mark in that panel.

The Crisi Wartegg System (CWS) is a new methodology for the use of the Wartegg Drawing Completion Test (WDCT) that rigorously scores and interprets the drawings of the clients. Psychologists in Italy, Japan, Scandinavia, and South America frequently use the CWS in psychological assessments. It is also a selection tool of the Italian military.

The CWS complete training consists of 4 levels;

Level 1 (3 days in Helsinki, Finland) — Learn administration and basics of the test; upon completion you will be able to administer, score the test and make the computations;

Level 2 (4 days in Helsinki, Finland) — Review basic interpretation of calculated indices and scores;

Level 3 (4 days in Helsinki, Finland) — Learn interpretation and clinical conceptualization;

Level 4 (5 days in Rome, Italy) — (OPTIONAL) Integrate the Wartegg with other measures (i.e., MMPI, Rorschach) through case consultations. This training is a good way to improve competence and prepare for the certification exam.

Certification is attained when one passes a certification exam, showing competence in the method, and has two completed clinical cases reviewed by the Istituto Italiano Wartegg.

Alessandro Crisi, Psy.D., SPA Fellow, is a licensed psychologist and psychotherapist in Rome, Italy. He is the founder and president of the **Istituto Italiano Wartegg** (Italian Institute of Wartegg) and an Adjunct Professor in the GSPP of Denver University, CO. For many years, Dr. Crisi has been an adjunct professor at Sapienza University of Rome, a consultant to the Rome Institute of Speech Therapy and to the criminal and civil courts in Rome. He also served on the executive committee of the Italian Association for Forensic Psychology. Dr. Crisi is the author of numerous publications on clinical assessment and psychodiagnosis. He frequently makes presentations around the world on psychological assessment and the Wartegg.

With minimal training, one can become familiar with what the CWS offers and can at least administer it, having someone who is certified score and interpret it. It is possible to Skype with Dr. Crisi in Rome for scoring, interpretation and consultation on your cases as soon as you have completed Level 1 training.

LEVEL 1
Introduction to the Crisi Wartegg System: A New Methodology
for the Clinical Use of the Wartegg Drawing Completion Test
September 20 – 22, 2018
Helsinki, FI

Objectives for Level 1. By the end of **Level 1**, participants will be able to:

1. Apply personal experience of test completion to clinical work with clients, predicting client reactions, behaviors, and performance variability;
2. Discuss the history of the WDCT as a performance-based personality assessment tool;
3. Summarize the empirical and conceptual foundations of the CWS and its potential applications in clinical research and practice;
4. List the steps required for proper administration of the CWS according to standardized administration procedures;
5. Score the major variables of the CWS;
6. Make CWS computations.

Prerequisite Training. This is an introductory level workshop, open to psychologists and graduate students training to be psychologists. Participants need no previous experience with the CWS, but previous knowledge of other performance-based personality tests will be useful.

LEVEL 3
Level 3 Training on the Crisi Wartegg System:
Intermediate Interpretation and Case Conceptualization
March, 7 – 10, 2019
Helsinki, FI

The Level 3 workshop focuses on intermediate interpretation and diagnostic meaning of the various indices, percentages, and ratios reviewed and scored during Level 1 and 2 workshops. Interpretation focuses on integration of indices into a client-centered conceptualization, detailing the client's functioning in the domains of cognitive abilities, reality testing, available energy, affect regulation, and interpersonal skills. Use of the Wartegg as it relates to the Collaborative/ Therapeutic Assessment practice of *Extended Inquiry* is further examined. Case studies are utilized to apply knowledge throughout the training sequence.

Objectives for Level 3. By the end of this **Level 3**, participants will be able to:

- Demonstrate understanding of the clinical relationship and interactions between CWS indexes and ratios through presentation and discussion of clinical cases;
- Interpret information provided in the CWS clinical software to develop person-centered understanding of the client assessed;
- Identify the specific CWS indexes and ratios relevant to clinical understanding of client's functioning in cognitive, affective, and interpersonal domains;
- Understand potential therapeutic value of CWS administration as intervention, using C/T *Extended Inquiry* approach to further develop insight and hypotheses.

Prerequisite Training. The training is open to mental health professionals and graduate students training to be mental health professionals. Level 3 participants must have completed the CWS Level 1 and 2 workshops, or have obtained independent study or consultation from Dr. Crisi.

Workshop Schedule.
